

ISOdx Version 4.4.2 Release Notes

New Functionality / Enhancements:

- Expanded the ISOdx Smart Scribe / Data Aggregation feature to include support for data stored by the ISOdx Compliance Audit Trail product.
- Creation of a stand-alone service (provided by a URL call) to identify differences between (2) strings or API objects. This tool can be used as part of the SmartView UI, or as a stand-alone addition to legacy applications.
- Message queue feature to collect and report on messages generated by the ISOdx ARM and CAT products.
- Creation of the Rollcall feature. This feature automatically generates a message when:
 - A snapshot is not received from specified device(s) in a specified time period, and/or
 - A snapshot does not contain specified data
- Expanded the out-of-the box Windows distribution (collection instructions) to include a tool for reading log files in reverse order (tac.exe).
- Hardened the Apache configuration to improve security, stability and performance out of the box.
- Yum installation capabilities for all “add-on” features (Messaging, Rollcall, External Diff, Smartview, Aggregator and Scribe).

Product Maintenance:

- Expanded the size limitation previously imposed on Windows Registry objects so that practically any size Registry object can now be collected.
- Modified Windows Filestat to correct special system variable conditions.
